

# ARCtec®-flex – Secure Furniture

## Furniture for eavesdropping protected rooms

### Security and design

Tables and chairs pose a considerable risk of eavesdropping in rooms that are secure against eavesdropping due to the possible placement of eavesdropping items.

Therefore only furniture that does not offer storage space is permitted in an eavesdropping protected/secured room.

Our **ARCtec-flex – Secure Furniture System** was developed in cooperation with the security authorities of the European Union and offers maximum security with full functionality and design.

### Areas of application for ARCtec®-flex – Furniture
